Ken,

As a follow up to my previous email about the bid results for the above referenced project; it is my opinion that the bid was unusually high because of the quick deadline for the first application. This is also potentially a reason for the lack of interest from other contractors. If the City could forgo the first application then my recommendation would be to reject the bid and rebid the project in January. I believe this would allow others to bid the project and would result in favorable bids similar to what we have seen in the past.

Please let me know if you have any questions.

Daren S. Anderson, PE
